PROFESSIONAL EXPERIENCE

Software Developer

February 2026 - Present

McMaster Advanced Space Systems

Hamilton, ON

- Led end-to-end full-stack development of the official MASS website using **Next**, building a scalable platform to support sponsor outreach, recruitment, and visibility.
- Improved sponsor conversion rate, securing **\$2K+** in funding for our CAN-SBX competition submission.
- Implemented responsive design, performance optimization, and Git-based CI workflows to ensure cross-device reliability and maintainable collaborative development.

VP Communications

October 2025 - Present

McMaster Game Development

Hamilton, ON

- Directed and created all promotional content on Instagram ([@MacGDC](https://www.instagram.com/MacGDC)), resulting in 30+ submissions to our flagship hackathon GameJam, increasing participation by **105%** compared to the previous year.
- Led weekly team meetings and monthly workshops on Godot, Unity, and Blender, while coordinating cross-club collaborations and sponsorships to amplify member engagement and community impact.

Financial Advisor Assistant

June 2025 - September 2025

Investia Financial Services Inc.

Markham, ON

- Supported the Branch Manager with daily operational and administrative tasks, optimizing investment portfolios and reducing processing delays by **15%**.

Assistant Teacher

September 2022 - June 2025

Spirit Of Math Schools Inc.

Richmond Hill, ON

- Taught an advanced math curriculum and launched weekly drop-in homework help sessions focused on personalized guidance, contributing to a **10%** improvement in average test scores among **100+** students.

PROJECTS

AI Client File System | GitHub

- Built a local-first desktop application using **Electron**, **React**, and **Express** that organizes per-client records on disk and integrates an AI assistant powered by **ClaudeAPI** for context-aware chat.
- Designed a **RESTful API** with 13+ endpoints handling client profiles, file uploads (up to 20 MB), and persistent chat history backed by a filesystem-as-database architecture.

Completion Calendar | GitHub

- Designed and developed a full-stack habit-tracking application built around an interactive calendar.
- Engineered a custom 2D physics engine from scratch in vanilla **JavaScript**, paired with custom animations.
- Architected a zero-dependency **Node.js** backend using only the core http module with atomic JSON file persistence, and packaged the app as a native Windows desktop binary via **Electron**.

TECHNICAL SKILLS

Languages: Python, Java, HTML/CSS, JavaScript/TypeScript, C/C++, SQL

Frameworks & Tools: Panda3D, Godot, GitHub, Git, Blender, Figma

EDUCATION

McMaster University

Hamilton, ON

Bachelor of Applied Science (BASc)

September 2025 - Present

- Computer Science (Co-op), GPA: 3.8/4.0
